

RESCUE

Vol. 13 No. 1 Official Newsletter of the Tennessee Association of Rescue Squads 2007 Published Bi-Annually

SPOTLIGHT ON...By Rusty Williams - TARS Training Coordinator

TRAINING: AN EVOLUTION IN PROGRESS

In 1975 the Governor's Highway Safety Program helped fund the development of the Vehicle Rescue efforts and training program used in Tennessee. Through a cooperative effort between the Division of Emergency Medical Services and the Tennessee Association of Rescue Squads, the program was initiated and a network of instructors was trained to deliver the program to the Squad and departmental level. By the early 1980's funding through the Highway Safety Program had run out and TARS accepted the responsibility of continuing the Vehicle Rescue program in Tennessee.

In 1985 TARS created an internal Training Committee and appointed Morris Simpson as our State Training Coordinator. Morris was an integral part of the evolution of our Vehicle Rescue program. He was and is instrumental in the development and growth of where TARS training is today. Today with a network of around 700 Squad and Department level Instructors throughout Tennessee and several neighboring states. The TARS

Vehicle Extrication program reaches over 3500 emergency personnel annually.

Over the years and as the need arose; new classes were developed and introduced into the Rescue College program. The College now

across the State has grown.

The TARS website has afforded us a way to stay better connected to our members and also our instructors. Our instructors can now enter classes online and get immediate feedback on class prices and cost. It has gives the TARS Office a better way of tracking the enormous amount of classes coming in, especially since the introduction of the Vanessa K. Free driving class. Since the launch of the online registration, April 1st, has seen class numbers jump from about 250 in 2005 to 992 from April 1st to December 31s, of 2006.

The website also give us a way to keep better tabs on our Instructors. With a few clicks I can see who is teaching classes and who isn't.

Parker Lowndes and John Ammons have done an outstanding job with the Dive and Swift Water Rescue classes. John has put together a wonderful group of instructors who are doing great things with this class. This is a very demanding class because of the dangers involved in this environment. These instructors and these classes

Continued...

Morris Simpson, TARS Training Coordinator Emeritus

includes 5 different Extrication programs, 2 Trench, a Building Collapse, 2 Swift Water, 2 Dive, and 4 Rope Rescue programs. In more recent years, Morris started doing an annual training schedule. This along with the introduction of the TARS website had done wonders for class participation. It has gotten the word out about the classes to individual members and they can plan ahead for the classes. Class participation

PRESIDENT'S MESSAGE...By Bill (B.J.) Robbins

I hope everyone had a Merry Christmas and a Happy New Year. I would like to send out a very big 'thanks' to Williamson County Rescue Squad for a great convention this past year. I'd also like to thank all the competitors this year in all the contests. Every one is a Winner!!! Thanks also to the people

who so faithfully supported and gave me a helping hand through the years that I have served this great Association as an Officer. If I can assist you in any way please feel free to call upon me at anytime. Hope to see you in the February travels.

REGIONAL NEWS

STATE VICE PRESIDENT

...By Jim Williamson

Hello to all, I can't believe we are at the beginning of another year. I hope everyone had a great Holiday season and got to spend some time with friends and family. I want to encourage everyone to attend the February Region Meetings. For those of you who have hosted these meetings in the past, you are aware if the amount of hard work it takes to hold a meeting and the TARS Officers are very thankful for all the squads that step up to the challenge. Please show your appreciation to the host squads by calling in advance to let them know how many will be attending and please attend. These meetings are a great way for all of us to stay connected.

I also want to encourage everyone to participate in the training classes that are being offered. We must continue to train and educate ourselves so we can be sure to provide the best service possible to those in need. Thank you to all of the squads that will be hosting classes. It could not be done without your help.

I look forward to serving you this year and am only a phone call or email away. You can reach me anytime at 731-446-7297 or rs16@charter.net. Be safe and I'll see you soon!■

REGION II VICE PRESIDENT

...By Kenny Blaker

After being Region II Vice President for the past three years, I have learned a lot about the squads in our Region.

I have worked with many of you on several call outs and the way you have handled these calls outs have been very professional. I'm very proud to know that if I need you all I have to do is pick up the phone.

I would like to thank all of you for the service you give to your community and to the Tennessee Association of Rescue Squads.

I look forward to serving as your Region II Vice President in 2007. Just remember to keep training hard and promoting training to others.

It was good to seeing you all at the past Convention and look forward to seeing you at the Region II Meeting in Claiborne County this February and in Bledsoe County in June.

I hope everyone had a Merry Christmas and a Happy New Year. Keep the Good work up and God Bless All!■

TARS 2007 TRAINING & EVENTS CALENDAR AVAILABLE

A 2007 calendar has been created that displays all of the year's training and meeting events. Each month features a different action shot of various training scenes as well and will be a sure hit for the 'rescue' enthusiasts. A limited number are being printed and will be available at the February Region meetings on a first come first serve basis.

The Calendar will cost \$12 at the meetings, but may be ordered by mail for \$14 by completing the information below and enclosing payment by check or money order.

Yes, I want _____ 2007 TARS Calendar(s). Enclosed is my payment, please return to the following address.

REGIONAL NEWS

HARRISON CONSTRUCTION PROMOTES TARS ON ROLLING BILLBOARD

A new Ready Mix Concrete Truck will be sporting the TARS logo across 8 or 9 counties thanks to Harrison Construction Company of Alcoa, Tennessee. Herb Anders, who works for Harrison Construction, and a member of the Board of Directors for the Knoxville Emergency Volunteer Rescue Squad, was instrumental in getting it approved and completed in record time.

Harrison Construction (a division of APAC) operates a fleet of ready mix trucks and has several that display custom artwork on the rotating drum. Agencies such as United Way and the American Cancer Society enjoy the

promotion of their organization through the "rolling billboards" and will now be joined by TARS. The idea is a great means of getting exposure and public recognition for deserving non-profit groups.

Several TARS members from area squads attended the unveiling

of the truck at KVERS headquarters along with local media. If your local unit has similar contacts that might consider such promotion of your organization, contact the TARS State Office regarding official artwork and approval. ■

APRIL INSTRUCTOR UPDATE FORMAT CHANGING IN 2007

The growth of the TARS Instructor I program has prompted a new look at how we are conducting the annual updates. Starting this year a few changes are being made in hopes of providing a more streamlined process of recertification of Instructors in the TARS system.

The biggest change is transitioning to a 2-year certification period versus the annual requirement that has been in practice. We are suggesting that those instructors whose Instructor number ending in an odd number plan on attending the update this year. We say 'suggested' because we realize some may ride together from a particular agency and wish to continue doing so even though one may have an even number and the other an odd. That's no

problem. We will have a means to group those wishing to recert on the odd or even year in place that will accommodate that need.

The fee will be \$20, remaining unchanged at \$10 per year, but will change to be collected bi-annually, payable at the update location. We request that you bring appropriate means of payment (check or money order) and not request billing due to the paperwork and approval process many times involved. This also helps us to keep our fees low by reducing staff time required to follow up with additional billing.

Be sure and note that a couple of locations have changed in certain Regions. This was done to more centrally locate the site within the Region. As always, you may attend any one of the 4 Regional

updates offered that best fits your schedule and availability.

If you do not attend and purchased a Vanessa K. Free Act Training program last year, the second module will be distributed and may be picked up and signed for by another Instructor from your department attending the update. If that is not possible contact us and we can arrange to mail the module to you following the April updates.

It is our intent to make this transition as smooth as possible and at the same time implement changes that makes your training experience more valuable and worthwhile. Look for more revised program content and better tools to help you deliver effective squad and department level training and the ability to keep track of it in all of our programs in the future. ■

TENNESSEE ASSOCIATION OF RESCUE SQUADS

REGIONAL RESCUE COLLEGE COURSES

* 2007 SCHEDULE *

ALL RESCUE COLLEGE COURSE FEES ARE:

* TARS - \$70 * * ASSOCIATE MEMBERS - \$85 * * NON-TARS - \$110*

ALL RESCUE COLLEGE COURSES

C.E.U. 1.0/START ON FRIDAY AT *6 PM AND END ON SUNDAY BY 5 PM

DIRECTIONS AND LODGING INFO AVAILABLE ON TARS WEBSITE

ADVANCED EXTRICATION

Course Description:

The Advanced Extrication Course gives a more detailed use of tools. It also has more one-on-one instruction. The theory of extrication is more complete. This is taught on a Regional basis by College Instructors.

Pre-requisites: Basic Extrication

Course Hours: 20

Min Enrollment: 20

NOTE: Participants will be required to furnish and wear full protective gear for all field exercises. (Extrication coveralls are acceptable but most do not meet NFPA standards.)

FARM RESCUE

Course Description:

The Farm Rescue Class is designed to introduce the student to situations and hazards related to Farm Related Accidents. Identifying hazards such as fertilizers, pesticides, and silos, as well as stabilization of tractor overturns and equipment disassembly are some of the subjects covered. This class is a mix of classroom and field exercises and is taught on a regional basis.

Pre-requisites: Basic Extrication Course
Hrs: 20

Min Enrollment: 20

NOTE: Participants will be required to furnish and wear helmet, gloves, eye

protection, and boots.

TRENCH RESCUE

Course Description:

The Trench Rescue Course is designed to impart knowledge and develop skills in order to properly shore trenches and to effect a cave-in rescue quickly with a minimum of danger to those involved. It will teach the student how to utilize equipment and resources already at their disposal as well as recognize the resources in the community that can be readily used in Trench Rescue. This class is taught on a Regional basis.

Course Hours: 20

Min Enrollment: 20

NOTE: Participants will be required to furnish and wear helmet, gloves, eye protection, and boots. and protection harness.

INSTRUCTOR I

Course Description:

The Instructor I course is designed to enable a student to teach a class from a prepared lesson plan. It prepares you to instruct the TARS basic squad level courses which include Vehicle Extrication, Emergency Driving (EVOC/VFK) and Bloodborne Pathogens. Separate modules are offered and if attended with in 1 year of the initial Instructor class the additional discipline class fee is offered at half price. Concepts of learning, communication skills, instructors roles and responsibilities, teaching techniques, and the use of instructional materials are also subject areas included. This class is taught on a regional basis.

Course Hours: 24/Min Enrollment: 20

Pre-requisites: Must have a high school diploma or GED certificate and have been a member of an emergency organization for three years. Students should have been certified in squad level courses within the last two years and have a First Responder medical level training

(or equivalent) rating. It is also preferred that a candidate have attended either the College Advanced Extrication or School Bus Rescue course for extrication instructor consideration.

Reference Material:

IFSTA Fire Service Instructor
TARS Instructor EVR Manual
Bloodborne Pathogen Instructor Guide
EVOC Trainers Manual

NOTE: The student may be required to give one five minute presentation on a (may be non-rescue related) subject of their choice. Any visual aids must be provided by the student. Another presentation may be required on an assigned topic. In the Extrication Series each student must provide and wear full protective gear for field exercises. Rescue tools are provided.

SWIFTWATER RESCUE I

Course Description:

The Swift Water Rescue I class will teach swift water dynamics, self rescue/swimming techniques, ropes and knots, rescue equipment, rescue board techniques, as well as, hands on in the water practice. It is recommended that students be experienced swimmers in good physical condition. This class is taught on a Regional basis.

Pre-requisite: First Responder or Equivalent

Course Hours: 24

Minimum Enrollment: 20

NOTE: The student will provide their
Continued...

Rescue College ...Continued

own personal flotation device (Swift Water type V), dive/rescue hard sheath knife, swift water rescue helmet, water rescue gloves, diving booties (hard sole), water type whistle (no internal ball), throw bag, and sturdy footwear for shore work; (3 mm wet suit required) 1 throw bag.

SWIFTWATER RESCUE II

Course Description:

The Swift Water Rescue II course builds on the techniques learned in the basic class. This class is primarily hands-on in the water exercises. Heavy emphasis is placed on Swift Water boating operations and the rigging of rescue line systems for swift water applications. This class is taught on a regional basis.

Pre-Requisites: SwiftWater Rescue I

Course Hours: 20

Minimum Enrollment: 20 (Max. 30)

NOTE: *The student will provide their own personal floatation device (Swift Water Type V), dive/rescue hard sheath knife, Swift Water rescue helmet, water rescue gloves, diving booties (hard sole), water type whistle (no internal ball), throw bag & 2 green chem. sticks., and sturdy footwear for shore work; 3mm wet suit*

DIVE RESCUE I

Course Description:

The Dive Rescue I course is designed to introduce qualified Scuba divers with underwater SAR techniques. Subjects covered include dive team equipment, procedures, and communications. Search patterns, recovery of victims, vehicles, and evidence are also taught in a mix of classroom and field exercises. This class is taught on a regional basis.

Pre-Requisites: Advanced open water certification, YMCA SLAM or equal, current first aid and CPR training.

Course Hours: 24

Minimum Enrollment: 10 (Max: 20)

NOTE: *See equipment requirement below on the Dive II.*

DIVE RESCUE II

Course Description:

The Dive Rescue II course is designed to build upon the DR I class with a special emphasis on underwater evidence recovery techniques. With many units supporting local law enforcement efforts,

this class covers important procedures that should be followed in searching, finding, and recovering evidence in the underwater environment.

Pre-Requisites: Dive Rescue I

Course Hours: 24

Minimum Enrollment: 10 (Max: 20)

**Required Individual Equipment: Participants are required to furnish the following equipment: mask, fins, snorkel, BC, regulator, octopus, gauges (depth, pressure, compass), two full tanks, weight belt w/weights, (Full) wet suit or dry suit, personal marker buoy, knife, dive light, dive watch, whistle, and P.F.D. Underwater cameras & standard cameras are helpful for evidence documentation.*

SCHOOL BUS RESCUE

Course Description:

The School Bus Rescue program is designed to give students a well rounded education on bus construction and types of buses. Basic extrication procedures, intermediate procedures, and advanced rescue techniques are taught in a mix of field and classroom exercises.

Pre-Requisites: Basic Vehicle Extrication

Course Hours: 20

Minimum Enrollment: 20

NOTE: *Participants will be required to furnish and wear full protective gear for all field exercises. Rescue tools will be provided. Lodging and food are on your own.*

WATER RESCUE & RECOVERY

Course Description:

The Water Rescue & Recovery course is designed to review the steps and procedures associated with recovery operations for drowning victims. Single and multiple boat operations will be covered as well as use of other resources such as K-9 and dive teams, underwater cameras and other systems available

which can aid such searches. Basic boating safety and victims handling procedures will also be covered in a mix of class and field exercises.

Course Hours: 24

Minimum Enrollment: 10 - (Max. 20)

NOTE: *Participants are required to furnish and wear coast guard approved flotation devices during water exercises.*

BUILDING/STRUCTURAL COLLAPSE BASICS I

Course Description:

This program will address in a mix of classroom and field exercises the tools and techniques required to deal with light frame structural collapse in Search and Rescue Operations. Topics will include: Structural assessment, building types, deployment considerations, vertical, horizontal, laced post and raker shoring will be taught, as well as breaching techniques and the use of specialized cameras and listening devices for searching voids in collapse situation.

Course Hours: 20

Minimum Enrollment: 20

NOTE: *Participants should be in good physical condition and must provide and wear sturdy work shoes, hardhat and eye protection, heavy work gloves and construction type clothing in all field exercises. Each applicant needs to bring a hammer, tape measure, and nail apron as basic personal tools. Lodging and food are on your own.*

BIG RIG RESCUE

Course Description:

The Big Rig Rescue program is designed to impart knowledge and develop skills in extrication techniques needed for large trucks and big road rigs. Stabilization techniques, access points and typical cab construction are some of the subjects covered. This class is a mix of classroom and field exercises.

Pre-Requisites: Basic Extrication

Course Hours: 20

Minimum Enrollment: 20

NOTE: *Participants will be required to furnish and wear full Protective gear for all field exercises. Extrication coveralls are accepted but most do not meet NFPA standards. Rescue Tools will be provided.*

2007 TRAININGS & MEETINGS SCHEDULE

Due to the growth of our Squad/Department Level Instructor I System, the following changes are being implemented this year regarding annual updates.

* A two year certification period will become effective for Level I Instructors this year.

* The annual fee will remain unchanged at \$10 per year. It will be collected bi-annually.

* Instructors with even numbers are suggested to attend their regional update on even years and those with odd numbers on odd years.

* Some locations for the 4 regional updates are changing to better centralize access and accommodate the larger attendance.

* Times and subject breakdowns are as follows (All Times Local). No pre-registration is needed.

Extrication 9:00 am - 12:30 pm

Lunch 12:30 - 1:30 pm

Bloodborne Pathogen 1:30 - 2:30 pm

EVOC/VFK 2:30 - 4:00 pm

Spotlight On Con't from Page 1 . . .

continue to be second to no one in the nation. This past year saw our Swift Water instructors working close with Pat Wagner (Mountain Rope Safety/TARS Rope Rescue). This is just another way our classes work together and intertwine as one. Working and teaching off the same page.

Pat Wagner, with the help of her students, friends and family, has built a great place to take a class. At her house she now has bunk rooms with a kitchen and living quarters for the students to use while taking the Rope classes. Also, there is a metal tower right off the living quarters to do some of the training on. Pat does everything from Low Angle to Rope Tech III and does an excellent job at all of them.

Our College level courses are coming along also. We are trying to take more instructors to each of the classes and limiting the number of students. This in turn will give us a better student/teacher ratio and should give everyone more hands on

training. In the future we will be using more props and trying to set up more 'real life scenarios'. Another goal is to provide more hand out material to take home.

Our Farm class has changed a lot in the last few years. I encourage you to come if you want a class to make you think and you don't care to get your hands dirty. Also in the Big Rig class there's nothing like working on a car with a real 90,000lb tractor trailer laying on top of it or working 6ft up a ladder holding on to a 42lb combi tool. The Advanced Extrication class will change a lot this year as well, with more props and to more of a thinking kind of class.

We went to Houston, Texas in November and took a class on new car technologies taught by Todd Hoffman. Todd is the founder of a group called "Scene of the Accident". He has been in the automotive industry for over 30 years and is considered an automotive expert. We came back from the class with a better understanding of what

we as Rescuers will be up against, and it is here now. We have a vast amount of information to pass on to you and will be doing so in the near future.

To say the Vanessa K. Free class has gone over well would be an understatement. Thanks to great partnership we have with VFIS, and the joint effort put out by both parties, we have the premiere driving program in the State of Tennessee. The demand for this class and instructors to teach it has lead to the biggest jump in instructors in the history of the Organization. This class could very well surpass Vehicle Extrication as our backbone of training. It is being taught, copied and even stolen by some emergency agencies in the State. Round 2 will make its first trial run in February.

Thanks for listening to me and remember "Train hard and stay safe, peoples lives depend on it"!
