TECHNICAL LARGE ANIMAL RESCUE

8 Hour Overview of Large Animal Rescue

This class is designed to give the first responder an overview of large animal rescue and the unique incidents that we as first responders are charged with mitigating. This class will consist of a 4-hour classroom presentation and 4 hours of hands-on training in moving the large animal. In the class we will provide the student with basic knowledge of the incident command system as it applies to large animal rescue, technical rescue equipment needed, PPE for the first responder, behavior of the pray animal, anatomy of the horse, trailer and road incidents, animal containment and immobilization and moving of the animal.
